HIS Product Training effort historical overview 2016

Part of the certification score (48%) is based upon HIS Product training. HIS places a high value on this aspect of our Partners skill set. The table below reflects the number of Valid training certificates held by your company and technicians.

Training Type		2016	2015	2014
Pro-Watch Eco	Valid Certificates	2	2	2
Pro-Watch Advanced	Valid Certificates	2	2	0
Pro-Watch Visitor Management	Valid Certificates	2	2	2
Pro-Watch Video Manager	Valid Certificates	2	2	4
Pro-Watch Enterprise	Valid Certificates	0	0	0
Pro-Watch Integration	Valid Certificates	0	0	0
Pro-Watch HSDK	Valid Certificates	0	0	0
User Selected Training Totals	Valid Certificates	0	0	0

Pro-Watch Eco Training certificates are valid for 2 years. Training certificates for Pro-Watch Visitor Manager (LobbyWorks) are valid for 3 years, however 2 years if acquired after 2016. Therefore any Pro-Watch training carried out in 2014 will not count towards your 2017 Certification assessment.

In order to maintain or improve your present Certification level you can decide, based on the overview above, to update the skill level of your technical team by enrolling them on one of our product training courses HIS is offering or any of the additional Professional Certification like Microsoft or Cisco training courses. An overview of our product training courses can be found on our website www.honeywellintegrated.eu via the exclusive HIS Integrators only section.

Integrators holding a Platinum certification level are allowed to conduct in-house Pro-Watch Eco System training for members of their own technical teams. Trainees are invited for an online E-Exam and after successfully passing the test, official HIS Pro-Watch training certificates will be returned by post. To ensure relevancy, in-house trainers must successfully complete refresher training on the respective Honeywell products every two years.

In addition, Closing Software Support agreements not only benefit the support you can provide for your customers, but they're also considered when assessing your Certification level.

Honeywell Integrated Security, 2017
